Licence agreement

The content of the **MATRIX refill package** (including all refill files, patches, wav samples and other files) is licensed, not sold, to you for use in your own music, film, television or multi-media production. You may use these sounds in any commercial or non-commercial recording without any additional licensing fees.

You may use these recorded samples and patches in a non-melodic, solo-ed context in a musical recording but you may not use them in a solo-ed context in a music library. You are prohibited from renting, leasing, sublicensing, or re-issuing this product.

You are prohibited from copying or duplicating this product or any of the contained samples in part or whole for the purpose of re-distributing, or reselling this product. You may not give, trade or lend copies of this product in part or whole to others (includes electronically transferring the contents from one computer to another over a network or via a modem).

PinkNoise Studio retains ownership of all the sound samples and patches. All samples were recorded and processed by Andras Haasz in 2008.

About MATRIX

MATRIX refill puts an Oberheim Matrix-1000 synthesizer into your reason rack. Featuring a wide range of warm analogue sounds, this collection lets you add dynamic basses, fat leads and vivid pads to your musical productions.

With a meticulous work we recorded the best sounds of this black beast, capturing all nuances and rebuilding them in NN-XT advanced sampler.

Oberheim Matrix-1000 is the last real analogue synth of Oberheim from the late 80's. The Matrix-1000 is a single-space compact rackmount module. It has the same synth architecture as the Matrix 6. Each of its 6 voices has 2 DCO's (digitally controlled analogue oscillator), a low pass filter, 2 VCA's, 3 envelope gens, 2 LFO's, and 2 ramp gens. The Matrix-1000 provides an excellent source of pads, textures and ambient sounds. *It has been used by Apollo 440, Juno Reactor, Moby, Cirrus, Fatboy Slim, Laurent Garnier, ATB, Depeche Mode, Future Sound of London, Pet Shop Boys, and Faithless.*

Abbreviations – special tags

We use some special tags in the file names. These special tags can be useful if you're looking for a certain type of patches. You should use these tags in the Reason browser for searching the desired patch type.

Abbreviations used in NN-19 & NN-XT

- [M – monophonic patch
- [V – velocity split
-][– wide stereo variation
- A, -B, -C : velocity variations of the same patch (NN-19)

Abbreviations used in Combinator

- [RUN] – Run button must be enabled for use
- (comp, ext. filter, xfade*) – refers to the effects that are used in the Combi patch

*xfade: you can morph between two instruments using the Xfade (Equal Power Crossfader, by Kurt “Peff” Kurasaki) controller (encoder 1).
